- Pudding
- Custard

### **AVOID FOODS WITH NUTS, SEEDS, PEELS, HARD EDGES, AND ANYTHING RED!**

CAUTION, DAY 10-18: Even though you will be feeling much better, CONTINUE to be cautious with your dietary intake. The scabs that are formed on your surgery surfaces are about to heal around second week, but any hard food scratching the throat, may cause heavy bleeding and may result in an emergency procedure.

*Continue with softer food choices at least 18 days following surgery, and avoid any foods that have hard edges such as pizza, hamburgers, fries etc.*
