

Hearing Loss?

Take this simple test

- | | YES | NO |
|---|--------------------------|--------------------------|
| • Women and children's voices difficult to understand | <input type="checkbox"/> | <input type="checkbox"/> |
| • Confusion among sounds of words: dime/time, bake/take | <input type="checkbox"/> | <input type="checkbox"/> |
| • Need to be directly facing a speaker to understand | <input type="checkbox"/> | <input type="checkbox"/> |
| • Frustrated that people mumble or slur words | <input type="checkbox"/> | <input type="checkbox"/> |
| • Continually asking people to repeat themselves | <input type="checkbox"/> | <input type="checkbox"/> |
| • Others feel you speak too loudly | <input type="checkbox"/> | <input type="checkbox"/> |
| • Prefer TV or radio louder than others | <input type="checkbox"/> | <input type="checkbox"/> |
| • Difficulty hearing within groups of people | <input type="checkbox"/> | <input type="checkbox"/> |
| • Avoid group situations where listening may be difficult | <input type="checkbox"/> | <input type="checkbox"/> |
| • Difficulty hearing at movies, worship, concerts etc. | <input type="checkbox"/> | <input type="checkbox"/> |
| • Have ringing in your ears/have noises in your head | <input type="checkbox"/> | <input type="checkbox"/> |

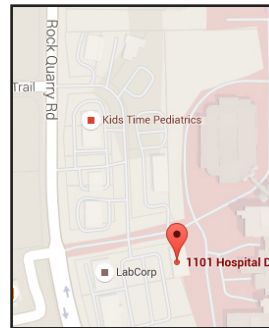

If you answered "Yes" to two or more of these questions, you may have a hearing loss and should have your hearing tested.

Our Mission

Our goal as Audiologists at Southern Crescent ENT is to provide our patients with the highest quality of service and care.

We specialize in...

Hearing evaluations: The objective of the evaluation is to precisely diagnose and treat hearing loss by testing both the perception of sound and the understanding of speech. This evaluation is completed in a sound treated booth, testing each ear individually.

Hearing aid fittings: We provide hearing devices for those patients desiring to improve their hearing and quality of life. We provide education about hearing healthcare and work individually with each patient to obtain maximum hearing potential and communication goals. We offer a full selection of hearing aids with payment plan options to meet each patient's needs.

Hearing aid accessories: We offer the latest technology in hearing aid accessories including Bluetooth communication devices for your cellphone and television.

Tinnitus (ringing the ears) and Vestibular (balance) evaluations: We work closely with our ENT physicians at SCENT to evaluate and treat tinnitus and balance disorders. This includes retrocochlear testing such as ABR (Auditory Brainstem Repsonse), VNG (Videonystagmography), and VEMP (Vestibular Evoked Myogenic Potential).

Audiologists

Christina Z. Luczynski, Au.D.

Adrienne Bowman, Au.D.

Lindsay Katz, Au.D.

Physicians

Michael Avidano, M.D.
Blanca Durand, M.D.
Wendy Harris, FNP-C
Michelle Dupont, PA-C
